

FreshStart Logistics: Bringing next-generation optimization technology to markets in need of highly dynamic transportation routing and scheduling solutions

What is Expert Dispatch Optimization?

FreshStart Logistics Expert Dispatch Optimization is an easy to integrate API supporting batch optimization of your vehicle fleet.

Leverage our industry leading, expert systems based batch optimization capability from your existing internal dispatch application to optimize daily pickup and delivery routes or use the engine to accurately model and evaluate the impact of changes to business process, markets, fleet or other infrastructure.

The FreshStart client immediately benefits from material cost savings, increased revenue potential and efficiency through improved asset utilization, and greater responsiveness to conditions on the ground.

FreshStart delivers Expert Dispatch Optimization.

- **Expert:** Emulate and enhance dispatcher expertise by leveraging computer speed and precision
- **Dispatch:** Our expert systems based technology enforces your business priorities so plans are immediately ready for dispatch without review and modification
- **Engine:** Our API is designed for easy integration to your existing dispatch platform

FreshStart's Expert Dispatch Optimization offers a better way to manage the routing and scheduling. Optimize the routing of your fleet subject to your business preferences and priorities.

Benefits

Key benefits of the FreshStart Dispatch Optimization solution:

- Substantial cost savings through optimal use of assets and fuel.
- Accurately estimate the impact of business changes on your bottom line
- Increased capacity from existing assets.
